### SAFETY FIRST

If you are at all like a majority of Americans, you hate politics! Don't forget though, the world is run by those who show up; *the politicians*. Remember, you may hate the process, but you can help decide who gets the right to show up and make laws when you vote.

Our legislature seems to be mired in partisan politics and we need to remember that it takes two sides to see that things get done and laws are passed. Even if the Democrats and the Republicans agree, it seems that common sense disappears.

If the House passes the bill, the Senate kills it. If the Senate approves it, it dies in committee in the House. The legislature did agree and pass some important bills, but here is a summary of some of the bills that died a death by committee in our state legislature:

#### Time Limit Extended for Crime Prosecution

This legislation would have provided the time necessary for the courts to prosecute the most heinous crimes and keep the worst of the worst off the streets.

**HB33 House Vote: 64-0**

**HB33 Senate Vote: Died in Senate Judiciary**

#### HB54:

#### Increases Penalties for Certain DWI Convictions

This proposed legislation would have increased penalties for DWI including habitual offenders, those driving with a suspended license for homicide or great bodily harm, offenders driving under a suspended or revoked license, and homicide and great bodily harm by vehicle. It has become clear that for multiple offenders, treatment programs are not enough. In the interest of safety for those on our roads, multiple offenders must serve longer incarceration terms.

**HB54 House Vote: Died in House Judiciary**

#### Amending DWI Requirements for Testing Blood

This bill would have allowed a municipal magistrate or district judge to issue a search warrant if a driver refuses a blood test. We need to ensure that all possible options are available to require that an individual driving erratically be tested for alcohol or drug consumption.

**HB71 House Vote: 66-0**

**HB71 Senate Vote: Died in Senate Judiciary**

**HB100:**

**Child Abuse Penalties**

This bill would have made the penalty for the intentional abuse of a child 12-18 years of age resulting in the death of that child, a first-degree felony. The current penalty for this crime is first-degree felony with a maximum of 18 years imprisonment. The bill would increase that to a maximum penalty of life in prison. This bill would right that anomaly in current law.

**HB100 House Vote: 62--6**

**HB100 Senate Vote: Died in Senate Judiciary**

**HB281:**

**Establishes Permanent "No Contact" Orders For Convicted Sex Offenders**

This proposed legislation would have authorized a judge sentencing a convicted sex offender to determine whether to issue a permanent no contact order to protect the victim. It ensures protection for the victim and authorizes a peace officer to arrest without warrant and take into custody an offender if there is probable cause to believe the offender has violated the no contact order.

**HB281 House Vote: Died in House Judiciary**

**HB 210:**

**Reading Improvement and Remediation**

This bill would have provided for reading improvement and remediation for public school students who are not reading or otherwise academically proficient in grades K through eight. Students who cannot read at grade level in the first years of school

are more likely to fall further and further behind and eventually drop out.

**HB210 House Vote: Died in House Education Committee (first hearing)**

These bills seem like some pretty good ones that could have helped with crime, DWI, child abuse, sex offenders, and education. They died in committee sometimes after passing in the House or Senate. The committees that decide the fate of these bills are selected by the party that is in the majority. The majority party that is voted into office.

So the next time you say politics is not my thing, just remember that the world is run by those who show up and you can help decide who is showing up!

**New Mexico Chapter**

Klinger has five employees in the ABC Apprenticeship Program, three are in 1<sup>st</sup> Year and two are in 2<sup>nd</sup> Year.

Graduation for the apprentices completing the four year program will be on **June 8<sup>th</sup>**.

Save the date to help us recognize their dedication and commitment to education.

**Happy Retirement!** We enjoyed two fun and memorable retirement lunches. First was for Carson Templeton who joined Klinger in 1988, and second was Bill Barlow who joined Klinger in 1986. *Joining the parties were some of our past retirees like Don Kawal and Glen Kitchens pictured above with Pete Jacobson, Bill Barlow, Carson Templeton, Tom Novak and Mark Maestas.*

**Best Wishes to Carson and Bill! (More photos on page 9)**

***Klinger's United Way New Mexico***

Thank you to all Klinger employees who have generously donated through United Way of Central New Mexico to the Community Fund and many other wonderful organizations.

**United Way  
of Central New Mexico**

There is no simple solution to the complex problems of poverty and the unpredictability of life. That's why UWCNM believes in a holistic, multi-dimensional approach to the issues facing our community. They foster collaboration with partners from many sectors to employ a collective impact approach that utilizes results-based accountability. The challenge is to not lose focus, which is why they build their strategy on the cornerstones of education, health, and basic needs and financial stability. All of their programs and partners pour their energy into addressing these issues.

## Raytheon

— Joe Reed

**Jeff Kardas** and **Carlos Gomez** completed the Raytheon project around the holidays. Work included an office refresh of 31,300 square foot remodel of existing space into two lab areas, turning a warehouse space into Raytheon’s showroom for their mobile range units, exterior improvements and reroof. Key subs include Service Electric, Sundance Mechanical, Bob’s Painting, Enchantment Carpet, Pelletier, and Pace Event Services.

## UNMH OSIS

— Joe Reed

**Lou Henckel** completed another project for UNMH. This one involved building a small addition and installing new UPS, UTS, battery cabinets for CT and PET CT units. Key subs were All American Enterprises, Firebird Structures, Mark’s Paint, BAM Custom Sheet Metal, American Fire Protection Group, and Specialty Electric.

## UNM Valencia Restrooms

— Joe Reed

**Greg Guillen** just completed the UNM Valencia Campus Restrooms Project. Involved remodeling six restrooms for the school. Key subs were Albuquerque Cabinet brokers, Pelletier, Mark’s Paint, Enchantment Carpet, Division 10 Materials, Inc, Futures Mechanical, and Northridge Electric.

## Montano Acura

— Brent Callahan

**Daryl Morrill**, **Jose Hernandez**, and **Ernest Sedillo** completed a building refresh in October 2017. The work consisted of the following: removal of a swamp cooler which served the parts department, installation of new 20 ton roof top unit for the parts department, installation of a new roof over the show room, installation of a new water heater, installation of new sinks, counter-tops, and bathroom partitions in the employee restroom, women’s and men’s restrooms, wall repairs, painting, new ceiling tile, grilles/diffusers, and light fixtures in the public areas, and new flooring in the offices and portions of the show room. Subcontractors and suppliers were: Artistic Millwork, National Roofing, Western Glass, Firebird Structures, Eagle Rock Contracting, Business Environments, JTC, Corb

*One Central, facing northwest*

Specialties, M & J Signs, CH Mechanical, Mechanical Concepts, and Specialty Electric.

## One Central

– Adam Leyba

Under the leadership of **Jason Tabbert** and **Angel Ramirez** the crews have done an exceptional amount of work since beginning in January 2017. The 420 space parking structure is complete and open to the public. Exterior finishes on the commercial spaces are being installed. Wood framing of the apartments is complete and MEP rough-ins are underway. Roofing is being installed to allow for insulation, drywall and finishes. A major challenge on the project has been the lack of laydown & storage area. The buildings sit on one complete block with zero lot lines on two sides. Special thanks to the City of Albuquerque for allowing us to shut down 1<sup>st</sup> Street to set up our cranes, pumps and lifts. The six story

**Break time at The Cage: Manuel Rojo, Gregorio Franco and Sergio Reynosa**

building is slated to be completed mid summer 2018.

## The Cage

– Brent Callahan

The Cage Self-Storage project is a four story climate controlled self-storage building. The delivery method of this project is design-assist. The project started in mid-September and is scheduled to be complete towards the end of June, 2018. This 102, 600 square foot

building will have 672 storage spaces. The structural system used in the second, third, and fourth floors will be a patented system provided by SS/20 out of Florida. **Rob Ridenour** is the superintendent for the project. Pulse Venture, LLC. out of Chicago is the owner of the project and Environmental Dynamics Inc. is the architect. The project will be a great addition to the Nob Hill area.

## Laguna Burger

– Joel Loes

In November, Klinger turned over the first Laguna Burger restaurant in Albuquerque. The 3,000 square foot restaurant at the Avanyu Plaza on 12<sup>th</sup> St is full of life, food, and drinks. The restaurant has beautiful NM themed murals and custom faux wood and corrugated metal accents throughout the space. There is a very large exterior patio with a gas fireplace, lots of seating, and colorful sun shades. It's no wonder there's a line every morning before the restaurant opens filled with hungry

**One Central: Mario Marquez, Salomon Cordero and Rogelio Perez**

patrons. Thanks to the entire team that pulled this job together including superintendent **Art Candelaria**, and carpenters **Jessie McGuinness** and **George Gallegos**.

## Costco C116

– *Joel Loes*

Hired by Victory Construction out of Denver, CO, Klinger was brought on to act as General Contractor for a new dairy cooler at the Costco on Renaissance. The project was led by Foreman **Vicente Ramirez** and required the crew to work overnight hours. Coordination with Klinger, Victory, and Costco was very thorough and helped the project progress smoothly. We are in negotiation with Victory for another Costco project in the near future.

## Facebook Security Perimeter

– *Jim Werkmeister*

Klinger has completed most of the concrete barrier wall and piers for the Facebook site, and is working at tying in the gate structures and the guardhouse. This winter’s dry weather and mild temperatures have been a blessing for the crews working on the concrete wall. Although the guardhouse itself is very small, it contains most of the finishes and trades involved in the main administration building on site.

**Eli Gonzalez**, **Antonio Trujillo**, and **Ramon Ramirez** have managed the Facebook work for Klinger. Many employees have worked for long periods of time on the site since last

September. Most of Klinger’s Security Perimeter Scope will be completely wrapped up around May 1<sup>st</sup>.

## Oso Bio

– *Jim Werkmeister*

**Larry Gastion** and **Daryl Morrill** have been running the work for Klinger at the “other” Oso Bio location in Albuquerque. They are performing the civil, structural, and architectural aspects of Oso’s new syringe line. Work is expected to be functionally complete later this spring.

## GCC Rio Grande Cement

– *Jim Werkmeister*

**Edgar Garcia**, **Felix Ruiz**, **Ron Cleavenger**, and others have all been active in the recent work at GCC Rio Grande. The cement plant in Tijeras is pretty old, and many unrelated systems and features need repair and maintenance. The plant is still producing a lot of cement, and GCC needs it to continue to do so. **Edgar** and his crew have proven them-

selves to be valuable and efficient at many aspects of the necessary repairs and maintenance. Klinger has a long history with the cement plant in Tijeras, and we look forward to continuing that relationship with GCC long into the future.

## Intel

– *Jim Werkmeister*

The catch-all jobsite location of “Intel” has meant a lot of different things to Klinger over the years. At the moment, that jobsite is a mix of mostly electrical work with a small bit of sheetmetal work thrown in as well. **Jeff Kardas**, **Juan Payan**, **James Rosas**, and their crew have finished up running all the raceway for the recent security upgrades that took place around the plant. They will also be working on the upgrades to the air handlers throughout the first half of 2018. There have been, and will continue to be numerous small projects for the electrical crew coming to them via JB Henderson and the maintenance contract.

Facebook from left to right: Joel Duran-Morales, Hector Ruiz, Nate Willie, Tom Pacheco, Jose Trejo and Jesus Villa.

## Coronado Mall GGP Landlord Work

— Joel Loes

Superintendent **Pete Jacobson** continues work a Coronado Center for the landlord, GGP. The old Gordman’s space on the west side of the mall has been demoed and turned over to the tenant contractor while work continues on the new exterior egress stairs for the Round 1 entertainment center. GGP awarded KCL a significant amount of what would have been tenant work

in the under slab plumbing as it required careful coordination with Dick’s Sporting Goods for an extended amount of night work. Foreman **Byron Alvarez Sr.** lead a crew of core drillers, carpenters, plumbers, and painters through the work without any issues from Dick’s. Great job!

Work continues in other areas of the mall with the same team. Klinger is completing the 9,115 square foot vanilla shell for Cozy Fox in an area of the old Sears store that we

recaptured for new tenants during the Seritage project in 2017. The project will turn over the first week of March and bring in another exciting clothing retailer to Albuquerque.

In February, KCL was awarded our sixth contract with GGP and our ninth project in Coronado Center since 2015 for the landlord cold dark shell for Menchie’s, again in an area recaptured during the Seritage project. **Pete** continues to roll through additional projects added under his supervision to ensure that all levels at GGP, Coronado, and neighboring tenants remain happy with our work.

## General Mills

— Joel Loes

At the end of 2017, General Mills decided to change construction delivery methods from their typical protocol in engaging a large construction manager to over see the multiple projects the plant saw annually. They issued a request for proposals on their first design-build project for 2018. Klinger was

General Mills crew from left to right: Francisco Sarmiento, Leonard Gonzales, Nick Danielson, Harry Yazzi, Waldo Trujillo, Louis Maldonado, Daniel Jimenez, Victor Urquidi-Morales, Eli Gonzalez Jr. and Antonio Loya

awarded the 16,300 square foot dry storage warehouse. We partnered with Dekker/Perich/Sabatini, BG Building Works, and AEDi for design. Superintendent **Joe Aguirre** and Foreman **Eli Gonzales Jr.** are preparing for their first 500 cubic yard pour at the beginning of March and completion in June. Butler Building provided our metal building and insulated metal panels.

## Route 66 Buffet

– Joel Loes

In mid-January, Klinger wrapped up the available work at the Route 66 buffet project started the previous summer. The building is now structurally sound, sitting on nearly 190 micro piles and push piers. Underground plumbing is installed under a structural slab in 60% of the 18,000 square foot buffet. Now at the start of March, the Owner has nearly finalized their new venue layout, equipment, and budget so that the second phase of design can proceed and Klinger can return to the site to finish what we've started.

**Route 66 Holiday Lunch: Celebrating with subs are Eli Gonzales Jr. Victor Urquidimorales and Juan Hernandez.**

**One Central's Parking Lot Opening: Jeff Slopek, Jason Tabbert and Adam Leyba. Jeff joined the office as Project Manager in December**

## AIS Building C

– Joel Loes

The third and final project at the first phase of Avanyu Plaza is well under way led by Superintendent **Art Candelaria**. The 2,100 square foot building C in the retail development Klinger first started in 2015 is nearly dried in. The standalone building will hold a new Domino's Pizza, a tenant improvement contract that Klinger was also awarded. It's been a unique project in seeing the design develop to match the southwest style of the first two buildings (Starbucks and Laguna Burger) being translated to match the design requirements of Domino's Pizza. The pizza chain will open for business in their nicest location in May.

## Las Lomitas Plaza & Growler USA

– Joel Loes

Klinger is incredibly excited to be part of Acoma Business Holding's

development team at the Las Lomitas Plaza Phase 1 project at Unser & Vista Oeste NW. The first phase of the project will see the development of a 2.7 acre site including utilities, parking, and landscaping. A 4,000 square foot building will be erected on site for Growler USA, a new tap room to New Mexico which broke ground in February and is set to complete in July. As interest in the site develops, building pads have been prepared for two more buildings that may be added to the scope in the near future. Superintendent **Eli Gonzales Sr.** is leading the project and off to a great start.

## Ideal Vacuum Products Warehouse

– Brent Callahan

Klinger was awarded this project back in December. Ideal Vacuum Products is a repeat customer as we did a previous project in 2011. The owner purchased a building right next door to their current

location for the expansion of his operations. This project started the second week of January and is currently scheduled to be complete the second week of April. **Lou Henckel** will be supervising this project which consists of an interior remodel along with utility upgrades. Subcontractors are: A-Core, ABC Door, ANI, Business Environments, Division 10 Materials, Dwight's Glass, Fairway, Harrison, Mark's Painting, Mechanical Concepts, Rob Boyles, Specialty Electric, and Sundance Mechanical.

## Tempur Pedic Productions

– Brent Callahan

**Pete Jacobson** and **Jose Hernandez** continue to work on several small projects. Some of the projects they have completed are: assistance with the installation of a utility elevator, installation of a utility road, installation of a new overhead door in an existing CMU wall for the new BZMA carousel Line, saw cutting of existing interior slab and creating pits for future equipment, fabricate a large crate and place the equipment within the crate for shipment to the Tempurpedic Dove Field location, installation of an exterior concrete pad for propane tank storage, installation of a re-heat unit for their QA Lab, remove and crate a large section of roller racks for new production lines. Projects which will be started soon are: fabrication and installation of a new catwalk and stairs

over an existing production line and Tempurpedic has stated there will be several projects starting in March.

## UNMH Medivators

– Joe Reed

**Daryl Morrill** started the 2<sup>nd</sup> Floor Medivator project at UNMH Main and once complete will start the 5<sup>th</sup> Floor Medivator project at UNMH BBRP.

Key subs are, Pelletier, Mark's Paint, BAM Custom Sheet Metal, CH Mechanical, and Specialty Electric.

## Bank of Albuquerque

– Joe Reed

**Jose Hernandez** has done several teller line demos, working week-ends and after hours.

## UNM Domenici Restrooms

– Joe Reed

**Greg Guillen** started the UNM Domenic Restrooms Project. Involves remodeling two restrooms for the school. Key subs are Artistic Millwork, Pelletier, Mark's Paint, Enchantment Carpet, Southwest Glass and Glazing CH Mechanical, and Northridge Electric.

**Don Kawal and Adam Leyba**

**Tom Novak and Bill Barlow**

**Also enjoying the retirement lunch: Mark Maestas, Joe Reed, Brent Callahan and Greg Guillen**

## Project Awards

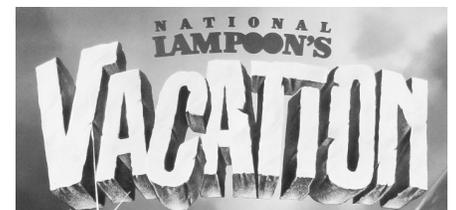

– Shirley Anderson

Klinger projects received awards once again at both ABC and NAIOP. In December the New Mexico NAIOP Chapter hosted their annual awards luncheon. Klinger’s team joined over 500 people attending the event.

**Mark Maestas and Rob Ridenour** completed Hotel Chaco and received the Eagle Award from both NAIOP and ABC for Best Hospitality Project.

**Adam Leyba and Pete Jacobson’s DaVita Medical off I-25** was also recognized by NAIOP and ABC with an Eagle Award for best medical project.

**Joel Loes and Joe Aguirre’s Coronado Renovation** received the Eagle award from ABC for best renovation and an award of Merit from NAIOP.

This year NAIOP’s event theme was National Lampoon’s Vacation with videos of fun skits. Once again Klinger’s **Tom Novak** and **Shirley Anderson** participated in scenes and were joined by **Joel Loes** playing Rusty. This was Shirley’s seventh year as a volunteer on the NAIOP Awards committee.

*Projects also recognized with Awards of Merit were: Adam Leyba and Carson Templeton’s DaVita Administrative Office Remodel and Brent Callahan and Larry Gastian’s French Funeral Grief Center.*

A W A R D C E L E B R A T I O N S

Klinger has been well represented over the years at both the NAIOP and ABC Awards celebrations. This is an opportunity for Klinger to share with the community the amazing and award winning projects that we complete each year.

***Pictured top left at ABC Dinner: Shirley Anderson, Joe Aguirre, Pete Jacobson, Joel Loes, Rob Ridenour and Yati Athivarapu.***
