Presbyterian Westside Medical Complex opened in October, 2011. The building is located on the medical campus of their new Rio Rancho Rust Hospital currently in the final phase of construction. Klinger recently completed the three story shell and is building out 55,000 square feet that includes 54 exam rooms for family practices and specialists in addition to supporting laboratories and radiology units.

Presbyterian Healthcare Services is committed to providing Albuquerque's Westside with a state-of-the-art hospital campus with a healthcare delivery system that will meet the needs of New Mexican's today and in the future. The new healthcare system will be a safe, patient-centered, operationally efficient and flexible, environmentally friendly and technologically innovative.

The new medical office building is connected to the new hospital with a two-story walk-way.
